Ric Weinman, the author of *Your Hands Can Heal* and *Breaking the Illusion*, has studied and practiced healing for 15 years. In late 1994, he stumbled on Vortex Energy.

"I was clearing a house," he recalled, "and discovered I could grab hold and pull this energy out of the universe and into a house. One day while I was doing this, a voice started talking to me. It guided me to remember that I had learned to use this energy in past lives."

Weinman describes VortexHealing as an incredibly powerful healing art from the Merlin lineage. "It derives its name from a particular energetic vortex structure that is the interface between our physical world and a special healing realm that is accessed in this art. This healing realm is what makes VortexHealing so unique." He goes on to say that the practitioner can channel not just a very powerful healing energy – the energy and light of the vortex – but also the consciousness of this special realm, which is composed of seven divine beings whose sole intention is to manifest healing. This enables VortexHealing not only to perform deep healing on the physical and emotional level, but also to release the deepest karmic issues we hold as human beings. They are transformed directly by divine consciousness."

During a winter visit to Arizona, I was watching Ric Weinman demonstrating a new healing energy. "By pulling in this energy," he told me, "I'm going to create the essence of a pine forest in my kitchen."

We stood in his kitchen. Weinman closed his eyes and began to breathe deeply. In a moment, as I watched, he created the feeling of the forest. I smelled the scent of crushed pine needles, and felt the cool air of dense stands of pines on my skin.

His window was closed.

Weinman began working with the energy to heal people with serious health problems treating cases of leukemia, hepatitis and chronic fatigue syndrome.

Weinman elaborated on one of his cases: "This man had had hepatitis 10 years earlier. I put him in the healing realm for no more than five minutes. The next day the woman came running up to me and said her boyfriend was energized, sweet and helpful for the first time in ten years. It was as if he'd been beamed up and they'd taken out the old soul and put in a new one."

VortexHealing is taught by transmission. For the workshop, Weinman creates a powerful energy field that runs 24 hours a day for five days. Participants are immersed in that field as they learn how to work with the energy. Advanced classes offer more techniques.

Weinman often demonstrates the power of Vortex energy by putting a musical instrument in the healing realm. "The sound of the instrument improves remarkably," he said. "It is easy to extrapolate from that to what it is capable of doing to a human body and energy system. You'll never encounter any other healing art like this."

Those who take his workshop have the vortex wheel directly imprinted on their nervous and energy systems and their consciousness creating a permanent connection. "In the process," Weinman explained, "the student's entire energy

system is put through an intense light acceleration that restructures it to hold and handle more light. At the end of the five-day training, everyone has a lot more light in his or her body and energy field. This acceleration is permanent.”

Being in the vortex energy field for five days promotes self-healing on a physical and emotional level. Weinman promised that everyone in the workshop would lose a couple of “karma knots,” as he calls them – knots on the spine that contain karmic issues. Most of the participants were able to feel the karma knots break free and spin away. After my experience with losing one, I felt noticeably different. I was still aware of a particular behavior pattern, but there was no longer any emotion connected with it. This made it easy to eliminate the pattern of behavior itself.

In the workshops, we learned to channel Vortex Energy and energy from the divine realm, called Mauma, and to do in-person and distance healing. Weinman also taught some basic wizard tricks. We learned to put Vortex Energy into a jar that could be sealed and given to someone to use for healing or for clearing a room.

A friend who also took the workshop used it after she burned her dinner in the broiler. When I arrived a few minutes later, there was no smell, although she showed me the burned food as evidence. I remembered the pine forest in Weinman’s kitchen just a few months earlier.

I began to practice VortexHealing on family members and friends after the first workshop and I am impressed with the impact VortexHealing has on people. My mother experienced relief from the pain of osteoarthritis and a return of her strength. A friend’s persistent eye infection vanished overnight. Another friend received relief from an ear infection.

VortexHealing can be used to help people, animals and the earth. Weinman teaches his advanced classes to do earth healing. He has led several workshops in Ireland. “Because the Vortex is designed as an interdimensional structure,” he said, “it is a natural tool for facilitating earthshifts and accessing the immense amount of divine assistance that has become available for our present human acceleration.”

Weinman also adds that in advanced Vortex work, practitioners learn techniques, which enable them to directly participate in this acceleration. For example, they learn to open vortex spaces over towns and cities, and to open special energetic funnels so that the divine assistance that is trying to come in has a pathway to do so.

Weinman said that VortexHealing began with an avatar that lived in India about 5,600 years ago. After his death, this avatar, which manifested the aspect of magical transformation, organized the healing realm and merged this own consciousness with it. As the source and guide for the Vortex, this avatar took the name of Merlin. In 756 B.C. he revealed himself and the existence of the healing realm to a spiritually advanced man in England. This man became the first human Merlin. He chose to manifest what had been revealed to him as a path for healing and enlightenment. This teaching became the “Merlin lineage.”

“VortexHealing was resurrected in time to facilitate the earth shifts,” Weinman said. “It’s an incredible interdimensional tool to use to allow energy to come in to create change.”
